Registered Nurses

Mental Health Counsellor

How I may be able to help:

Works with other members of the team to support you through treatment

Will choose the best medication option for your treatment

Monitor you throughout your treatment

Prescribe tests in order for you to get treatment:

- Bloodwork - To assess your liver, exposure and specific strain of Hep C
- Fibroscan - A test to measure the degree of liver scarring using sound waves
- Ultrasound - A picture of your liver. Shows the shape and size.

How I may be able to help:

Give you information and education before, during and after your treatment

Refer you to other services when needed

Look after your medical needs before and during treatment

Work with other members of the team to care for you

Make appointments for you Help you get funding

How I may be able to help:

Provide you with counselling services to emotionally support you through treatment

Can perform acupuncture treatment for you

Can refer you to other community agencies and consult with them on your behalf

Help monitor your progress

Communicate and work with other team members to fully support you

Educate you and your family about mental health and Hep C
