

Scheduled for an upcoming surgery?

Please bring two reusable bags for your belongings

One big enough for your shoes and the other big enough for your clothes as plastic bags are no longer provided.

DID YOU KNOW?

On average, **thousands** of plastic surgical bags are given out to patients on a monthly basis to provide storage for belongings such as clothing and shoes during surgery.

These bags are thicker and larger than regular single use plastic bags, and commonly end up in landfills where they contribute to soil and water pollution, negatively impacting animal and human health.

Niagara Health thanks you for bringing your own reusable bag and improving the environment.
