NIAGARA HEALTH

Occupational Health & Safety Department
Communicable Disease Surveillance Program

Section 1 to be Completed by Applicant

School/ Agency:			**Program:**

Name: ____________________ Classification: STUDENT □ VOLUNTEER □ CONTRACT □

Hospital Site: ____________________ Department: ____________________

D.O.B. ____________________ Home Phone: ____________________

Address: ____

E-mail address: ____________________

The Communicable Disease Protocols require that hospitals must have document proof of immunization and/or history of specific communicable disease for all persons, including employees, physicians, volunteers, students and contract workers carrying on activities in patient care areas of the Hospital. **This requirement must be met prior to commencing the first day of volunteering/placement. If you have been fitted for an N95 respirator mask, you must provide proof of the date tested and type of mask you were passed on.**

Please provide this information to the Hospital Occupational Health & Safety Department . I authorize the release of the following information to the Occupational Health & Safety Department and Student or Volunteer resources.

Signature ____________________ Date ____________________

Communicable Disease Surveillance Program

Section 2 REQUIRED

Section 2 must be Completed by Health Professional

3. **Documentation of a Two-step (2-Step) tuberculin skin test is also required.** An initial tuberculin skin test (Mantoux, 5TU PPD) is given. If this test result is 0 - 9 mm of induration, **a second test is given in the opposite arm at least one week and no more than four weeks after the first.**

If it has been over 12 months since the last 2-step test, then a one-step test is also required

Tuberculin Skin Testing

1) Date Given: ______________ Given By: ______________ Date Read: ______________
Read By: ______________ Result: ______________ (________ mm. Induration)

2) Date Given: ______________ Given By: ______________ Date Read: ______________
Read By: ______________ Result: ______________ (________ mm. Induration)

3) Date Given: ______________ Given By: ______________ Date Read: ______________
Read By: ______________ Result: ______________ (________ mm. Induration)

TB test results MUST BE recorded in both words and numbers (e.g. Negative 0 mm induration)

Persons who have had previous B.C.G. vaccine should be assessed as above. Persons who are tuberculin positive must have a chest x-ray if they have:

- Never been evaluated for a positive TB test or tuberculosis;
- Had a previous diagnosis of TB and have never received adequate treatment for TB; or
- Pulmonary symptoms that may be due to TB.

The physician must report all positive TB skin tests to the Public Health Department.
