

NiagaraHealth

NOW

Be at the centre of your care with niagarahealth NAVIGATOR

We're revolutionizing the way patients connect to healthcare information and their care providers – all from their mobile device. We recently launched Release 1 of Niagara Health Navigator mobile platform and want your input.

Don't miss this unique opportunity to participate in the creation of this made-in-Niagara digital solution that will put patients at the centre of their care and connect providers.

Download the app for free from the App Store or Google Play to provide your feedback.

Niagara Health Navigator will support patients and families to more easily access their health information, navigate the healthcare system and connect with their team of providers. The platform will be secure and protect patient privacy.

Release 1 is the first version of the platform and offers a limited selection of apps so users can engage with the content and provide feedback. This information will help inform the next release of Niagara Health Navigator and ensure it is as user-friendly and effective as possible.

The first release features the following apps: NH Newsfeed; Wait Times (Emergency Departments and Urgent Care Centres); Rate Your NH Experience; Thank NH Staff; Express a Concern; NH Twitter Feed; Sites and Services; and App Support and Feedback. We'll be adding new apps and features in future releases.

Thanks to our partners IDENTOS Inc. and nCipher for helping us bring Niagara Health Navigator to life.

And thanks to you for helping us to improve the patient experience through the use of mobile technology.

Need help downloading the app, or it's not working properly?

Email help@niagarahealthnavigator.ca or call the Resource Centre at 905-378-4647.
