

ONE MILLION+

ways we are providing care closer to home

The opening of Niagara Health’s St. Catharines Site on March 24, 2013, ushered in a new standard of hospital care in Niagara.

Thousands of local cancer, heart and mental health patients now have access to vital healthcare services right here in Niagara. Here’s a snapshot of examples of care our teams have provided since the opening five years ago.

CARDIAC CARE

Cardiac services have significantly expanded in recent years due largely to the opening of the Heart Investigation Unit.

8,750

cardiac catheterizations, a new procedure to diagnose the severity of a patient’s cardiac disease

2,012

Percutaneous Coronary Interventions, a new non-surgical procedure that opens blood vessels in the heart to remove blockages

MENTAL HEALTH AND ADDICTIONS

The Mental Health and Addictions Program has introduced a number of new specialized programs, including services for patients requiring longer-term treatment in hospital and psychiatric emergency care.

141,392

outpatient visits for patients who did not require an overnight stay in hospital

29,802

Emergency Crisis and Psychiatric Emergency visits

CANCER CARE

The Walker Family Cancer Centre brought radiation treatment and other oncology services to Niagara for the first time.

3,691

patients received radiation treatment

64,244

radiation treatments

4,133

patients received chemotherapy treatment

54,005

chemotherapy treatments

Numbers projected to end of March 2018.

108,863

Inpatient admissions

797,347

Outpatient clinic visits

Extraordinary Caring. Every Person. Every Time.

CARING FOR OUR SMALLEST PATIENTS

Our Women's and Babies', Special Care Nursery and Children's Health units provide care in bright, spacious areas. It's a very busy area of the hospital and we're proud of our care teams, who have been recognized nationally for their work.

14,383

births

9,928

patients in Children's Health Unit

2,598

patients in the Special Care Nursery
