Start/Stop [217]

Description: Open patient's chart and access Medication History either through Home Meds on Outpt Workflow or clinic powerform in adhoc folder

Step Impact: Training

Comments: Clinician can pick home medication on outpatient workflow and on the left clinic the medication history.

or

Clinician will pick the powerform that is appropriate to the clinic they are working within and document current medications that patient is taking from all prescribers they see.

Future State: Ambulatory - Outpatient - Documenting Medication History

Last updated by Lezlie Leduc, Mar 08, 2024 10:58am (UTC -5 hours)

Work Step [218]

Description: Review/Update Existing and Home Medications. On the right side of Homes component click on Meds History

Step Impact: Policy/Procedure

Comments: Document compliance and update per policy

Decision [220]

Description: Are there new medications to document?

Step Impact: Training

Comments: If a user can't find a medication when documenting med history, use the "template non-formulary" order

Work Step [223]

Description: Add medication(s) and order details including compliance and comments. Sign off on new medication added

Comments: For medications not available via search, use the Non-Form medication order to document those and free-text the name, frequency, and other pertinent information.

Decision [221]

Description: Document compliance status for existing medications.

Start/Stop [243]

Description: Complete document med history by clicking on document history. Green check mark beside med hx will show completion.
