Start/Stop [4]

Description: Patient requires recurring in-office medication administration

Comments: Day of Treatment functionality can be leveraged in Ambulatory for recurring medication workflows for medications like Testosterone, B12, Rocephin, Depo Provera, Steroid Injections, Botox, Bolus Fluids (Hydration). There may be additional medications that apply and will need to be evaluated on a case by case basis.

Decision [12]

Description: Has PowerPlan already been ordered?

Method: PowerOrders

Future State: Ambulatory - Recurring Medications

Cerner Workflow ID: 8802 (v. 17.0) Client Workflow ID: 233

Last updated by Lezlie Leduc, Apr 05, 2024 7:13am (UTC -5 hours)

Work Step [5]

Description: Select the applicable PowerPlan and choose either Plan for Later or Initiate Now

Method: PowerOrders

Comments: Training Tip: Providers should select "Apply to All" when associating a diagnosis; otherwise, it will be required to be chosen at each occurrence.

Work Step [46]

Description: Confirm Initial and/or Subsequent Administration Start Date/Time and select OK

Work Step [8]

Description: Confirm Initial Administration Start Date / Time and mark order as Initiate Now

Method: PowerOrders

Work Step [9]

Description: Confirm details of plan and Sign

Method: PowerOrders

Comments: Once signed, there will be future medication orders available for future documentation of administrations and a RX that will indicate that the patient is on a recurring medication that is administered in office.

Swim Lane:
