

RESULTS REVIEW FOR CCRS

Results Review is a repository of all results charted in the EHR, including laboratory, diagnostic imaging, documents and clinical information (e.g., vital signs, measurements, lines and tubes).

To access Results Review, click **Results Review** in the **Menu**.

Click a relevant linked heading (e.g., **Labs, Microbiology, Diagnostics, Vital Signs, Clinical Information** etc.) found in other sections of the patient's chart.

Note the drop down next to the flowsheet type and the current highlighted **CCRS Review**.

Note the areas in the navigator and the results listed.

FILTERS

Changing the filter options only affects the tab being viewed on the patient chart that is being viewed. Updating filter options does not automatically apply to other patients' charts.

Change the layout

Select **Table** to view information by date, with the newest information on the left.

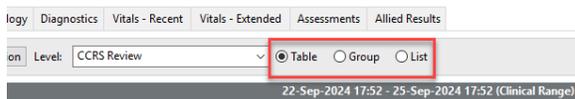

Select **Group** to view like results in sections with headers.

Select **List** to view results with a default of reverse chronological order.

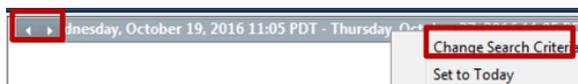

RESULTS REVIEW

HOSPITAL INFORMATION SYSTEM (HIS)

Change the timeframe

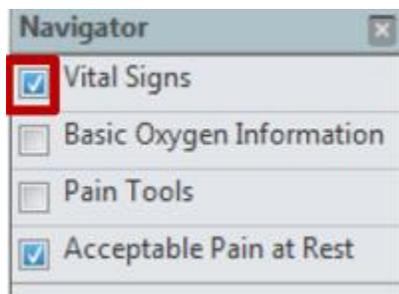

Click the grey arrows to manually change the timeframe; or Right-click anywhere in the grey bar and click **Change Search Criteria** to specify search criteria for the tab being viewed.

Change the view filter selection

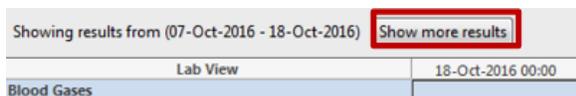

Check items in the **Navigator** to show results in the viewing area.

Uncheck items in the **Navigator** to hide results in the viewing area.

Show more results

- Click **Show more results** until you see the historical result you are looking for.

Review the results listed.

Critical results are shown in red, high value results in orange, and low value results in blue. However, this is a knowledge of the Provider and it is out of the scope of Admin to relay this information to a patient. *An asterisk indicates that there are comments available with associated results. Double-click on a result to view details (e.g., **Written Reports, Comments**).

Result Review Tab Definitions

Last 48 Hours: Displays a summary of all results from the last 48 hours.

Lab – Recent: Displays lab results for the last 2 weeks.

Lab – Extended: Displays lab results in intervals of one day for the last year and a half.

Microbiology: Displays all microbiology results for the last 6 months.

Diagnostics: Contains written reports for diagnostic imaging results for the last 5 years.

Vitals – Recent: Displays vital signs for the last week.

Vitals – Extended: Displays vital signs for the last year and a half.

Clinical Information: Contains clinical information documented by nurses (e.g., lines, tubes, drains, urinary catheters, head-to-toe assessment).

Assessments: Contains clinical assessments documented by nurses (e.g., BRADEN)

Allied: Contains information provided by allied health
