Nuclear Med Protocolling

Outpatient Requests – Technologist/Radiologist Protocolling

Providers will be placing 'Future' orders in Millennium to be performed during a future visit.

Placing the order as a future visit request will allow the order to be associated to a future encounter during the booking or activation step.

Power Chart provider order entry

*Requested Start Date/Time: 06/Jun/2024 12:15 EDT *Priority: Routine

*Reason for Exam: text

Order for future visit: Yes No

Exam to be performed outside organi...: Yes No

*Performing Location: SCS - St. Catharines Site

CC Provider: [Search]

CPOE outpatient orders will be directed to the Nuclear Medicine technologist's protocol list immediately upon order. Tech will open on the On- Line Work list and navigate to the 3rd tab

Future requests that are awaiting review will display on the technologist's Unapproved Requests worklist tab.

To filter list to only show Future orders, change the Schedule Indicator to 'Schedulable'.

Exam: Transcription: Unapproved Requests

Vetting Status: All Schedule Indicator: Schedulable

Requested DT/IM	Accession	Patient Name	Patient Type	Procedure Name	Priority	Vetting St.	Protocol	Protocol Comment
2024-Jun-10 16:02		ZZZTEST, DAVID		NM WBC Single Site Ind.	Routine	Not Vetted		

To action the order, the technologist will highlight the exam and use the vetting buttons.

- Accept – Approve exam and send to scheduling queue to be booked.
- Hold – Places a hold on the exam. Can be used to signify an exam requires follow-up. [Will decide later whether this functionality will be used]
- Replace – Launches the exam replacement window.
- Add on – Add an additional exam for the patient. [Will decide later whether this functionality will be used]
- Cancel – Launches the exam cancellation window.

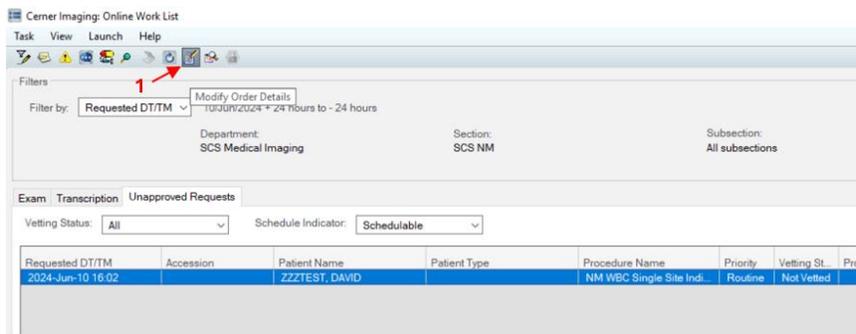

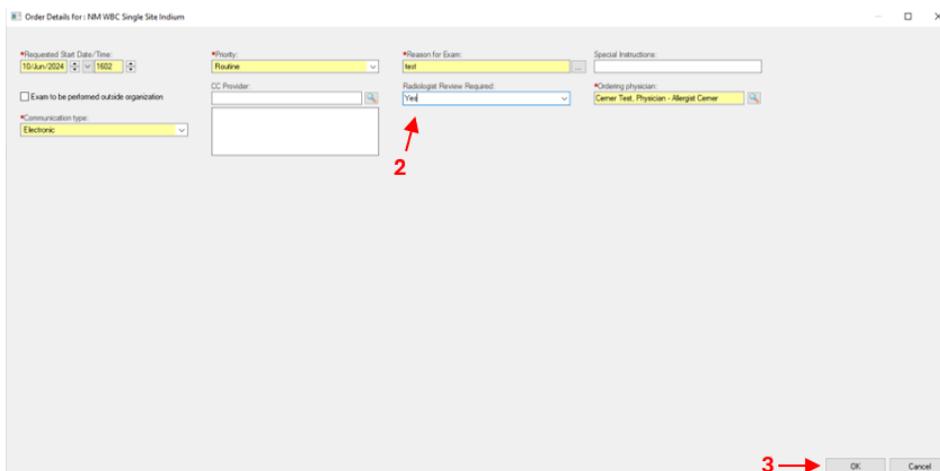

If the Radiologist needs to review the exam

Technologists will have the ability to push these requests to the Radiologist's protocol list.

From the worklist:

1. Highlight order and click the Modify Order Details icon in the toolbar
2. Update 'Radiologist Review Required' field to YES
3. Click OK

Order Details for NM WBC Single Site Indium

Requested Start Date/Time: 10-Jun-2024 14:02

Protocol Show Protocol Description

Protocol Comments

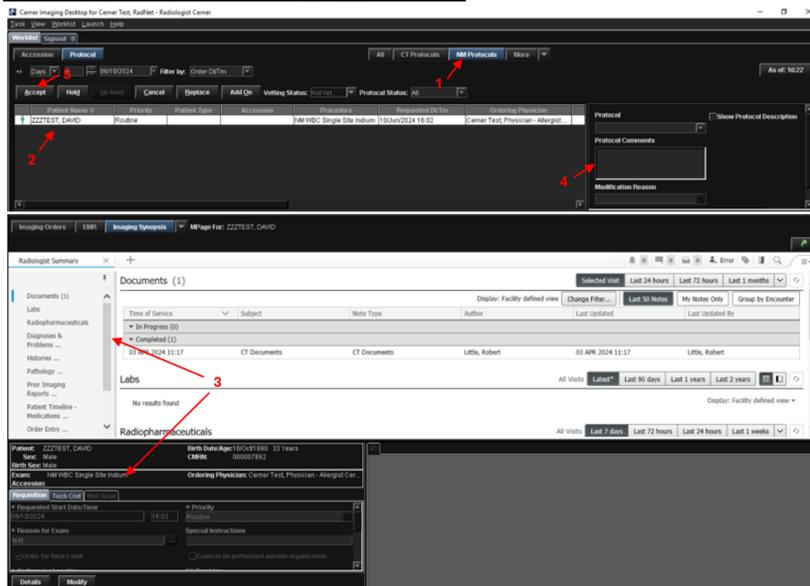

Modification Reason

Radiologists will be able to view a real-time list of outstanding protocolling in their Imaging Desktop application.

Radiologist Protocolling steps:

1. Select correct worklist tab (e.g. NM Protocols)
2. Select order/patient to protocol
3. Review relevant patient chart/order details
4. Add additional free-text protocol comments/click Save. [Will decide later whether this functionality will be used] -or-
5. Click Accept

Radiologist's protocolling application

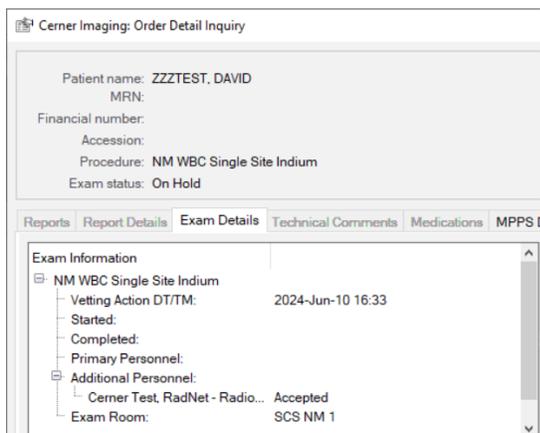

Once the Radiologist is done protocolling the exam the request will be sent directly to the scheduler's Request Queue to be booked.

TIP SHEET

HOSPITAL INFORMATION SYSTEM (HIS)

Techs will be able to reference which Radiologist protocolled/vetted the study by opening the Exam Details window from their worklist.

Inpatient/Emergency Requests – Technologist Protocolling

Ordering Prescribers will enter Inpatient/Emergency requests as 'Non-Future' orders.

Technologist will navigate to their On-Line Worklist (1st tab)

Technologists will see all active requests on their worklist that correlate to their exam room and date/time worklist filters.

For ED/Inpatients, the techs will decide if they want to proceed with the original request -or- modify/replace the order.

If the technologist needs to send this request to the Radiologist for review, they can use the above Modify Order Detail steps can be followed within the Exam tab, however this order will not flow to the schedulers Queue.
